## GENERAL INFORMATION

### TELEPHONE SERVICE REQUESTS

**Official telephones.** Requests for telephone installation or relocation should be submitted by the unit telephone control officer to 305 CS/SCX via the web-based Automated Communications System Requirements Document (ACSRD) process. Requests must be filled out IAW AFI 33-111. Telephones in the Visiting Airman/Officer Quarters are owned and operated by Lodging. Report all outages, comments, or complaints to the Lodging Office.

**Unofficial Commercial Telephone Service.** Residential phone service in the housing areas and dormitories is obtained from commercial vendors. Installation, monthly fees, toll charges, etc. are the responsibility of the resident. Contact the Family Support Center, at 754-3154, to apply for a deposit waiver.

### REPORTING NUISANCE CALLS

It is unlawful for any person to make a telephone call during which obscene, lewd, or immoral language is used with the intent to offend. Federal Law further prohibits interstate telephone calls which are obscene, lewd, lascivious, filthy, or indecent, or where the intent, with or without actual conversation, is to annoy, abuse, threaten, or harass any persons. It is also unlawful to knowingly allow anyone to use a telephone under your control for the above purposes. Anyone who receives a nuisance call should report it to Security Forces at 754-2001.

### MINIMIZE

Minimize is a condition imposed by commanders to control and reduce electrical communications, both message and telephone traffic, during exercises or periods of emergency. During such periods, vital and relevant

message traffic must be drastically reduced. Minimize may be imposed Department of Defense wide, Air Force wide, Command wide, or for given countries, states or areas as conditions warrant. Minimize may be imposed on DSN, telephone, teletype, or data systems. Telephone Systems include such services as long distance calls, administrative tie-line calls, etc. One or all systems or services may be minimized as required by the imposing authority. Further minimize notifications will specify what systems or services have been affected.

Officials designated to authorize traffic under MINIMIZE will:

- a. Approve only those calls which would adversely affect immediate operations if not sent, or are of vital importance or within a category specifically exempted from MINIMIZE, such as calls related to movements of aircraft, fleet units, troops, or to weather information, critical intelligence, or to serious illness, accident or death, involving military personnel or members of their immediate family.
- b. Assure assignment of the lowest priority that will provide necessary speed of service.
- c. Refuse calls that do not meet the above criteria.

### McGUIRE AFB TELEPHONE SYSTEM FEATURE TERMINOLOGY

**Access Codes:** Users dial these numbers to access special features. Access codes are usually preceded by a switchhook flash, or "\*" (asterisk sign) or # (pound sign).

**Switchhook:** Located in the telephone handset cradle, this device recedes into the telephone when the handset is put back into the cradle. The position of the switchhook tells the switching system whether the phone is in use or idle.

**Tones and Indicators:**

- a. Dial Tone:** Continuous tone heard when one first picks up the phone.
- b. Busy Tone:** An interrupted tone (once per second) heard when the called number is in use.
- c. Special Dial Tone:** Three short bursts of tone followed by steady dial tone. This informs the user to proceed with a feature activation code.
- d. Confirmation Tone:** Three short bursts of tone followed by silence. This informs the user that a feature has been successfully activated.
- e. Stutter Dial Time:** Rapidly interrupted tone. Used to indicate message waiting on analog telephones.

## COMMONLY USED FEATURES AND DESCRIPTIONS

- Call Hold:** Enables the user to place an active call on hold in order to activate another feature such as placing a call, or answering another station's call.
- Call Transfer:** Allows the user to transfer incoming calls to another extension.
- Automatic Callback:** If a dialed extension is busy the caller can be notified through this feature when the number becomes idle. The user's phone rings in a distinctive style, and the desired number is dialed automatically when the user picks up the phone.
- Call Pickup:** Users assigned to the same Call Pickup Group can answer another's incoming telephone call by dialing a special feature code.
- 3-Way Conference:** Allows Users to establish a three-way conference without operator assistance.
- Call Forwarding:** Allows an incoming phone call to be rerouted to a designated phone number.
- Call Park:** Permits users to "park" a call against their own extension number. The parked call can be retrieved from any phone with the call park feature assigned.
- NOTE:** All features may not be assigned to your present telephone. Some features are not compatible with one another and cannot be assigned to the same telephone number. For more information please contact your Telephone Control Officer or 305 CS/SCMP at 754-5454.

## **HEALTH, MORALE, AND WELFARE (HMW) CALLS**

HMW calls are authorized over the DSN network as prescribed in Chairman, Joint Chiefs of Staff Instruction(CJCSI) 6215.01B. HMW calls are not authorized on government-owned or leased cellular telephones, satellite phones, or via the FTS-2001 network. You can obtain copies of CJCSI publications at [http://www.dtic.mil/cjcs\\_directives/index.htm](http://www.dtic.mil/cjcs_directives/index.htm).

HMW calls are intended for military and Department of Defense civilians. HMW calls are authorized when:

- In an unaccompanied status at overseas or remote geographic locations.
- Single at overseas or remote geographic locations.
- Performing extended TDY for more than 14 days.
- Place DSN HMW calls at routine precedence, normally not to exceed 15 minutes.
- DSN HMW calls should not exceed a reasonable frequency as designated by the installation commander in conjunction with the base CSO. Reasonable frequency is normally considered no more than once a week. **EXCEPTION:** Emergency calls may exceed the established threshold.
- Extending DSN HMW calls to a commercial number (off-netting) is authorized, provided it does not interfere with operational requirements. Off-net DSN HMW calls will not incur a toll charge to the government even

if the intent is to reimburse the government. If the call incurs a toll charge, base operators may extend the call if the caller uses a credit/calling card to charge the call or the called party agrees to accept the charges (e.g., reversing of charges).

- On-netting of DSN HMW calls is permissible when placed from within the CONUS as part of Family Support "Hearts Apart" or other similar programs.

Military and civilian member's immediate family (anyone living within the immediate household) are permitted to place calls as part of the family Support

Center's "Hearts Apart" program. Contact the "Hearts Apart" Program Coordinator at 754-3541 for further information. Current policy is to allow two 15-minute Hearts Apart calls per week.

## **DIGGING PERMITS**

To ensure that underground communications cables are not damaged you must coordinate with the 305 Communications Squadron via AF IMT 103 prior to digging ditches, postholes, or any other excavation. This form is available through the 305 Civil Engineering Squadron's customer service section (telephone 754-2388) and must be approved by the Civil Engineering Operations Chief before excavation begins.

# TELEPHONE PRECEDENCE SYSTEM

## FLASH

### ***Transmission Preemption:***

Has precedence over any telephonic call of lower precedence. May be preempted by the application of the FLASH OVERRIDE capability available to National Command Authorities (NCA).

### ***Application:***

Precedence is reserved for alerts, warning, or other emergency actions having immediate bearing on national command, or security.

## IMMEDIATE

### ***Transmission Preemption:***

Has precedence over any other telephonic call of lower precedence.

### ***Application:***

Precedence is reserved for vital communications:

1. Which have an immediate operational effect on tactical operations.
2. Which directly concern safety or rescue operations.
3. Which affect the intelligence community operational role.

## PRIORITY

### ***Transmission Preemption:***

Has precedence over any other call of lower precedence

### ***Application:***

Precedence is reserved for calls that require prompt completion for national defense and security matters to ensure the successful conduct of war, or to safeguard life or property, which do not require higher precedence. Normally, PRIORITY will be the highest precedence that may be assigned to administrative matters for which speed of handling is of paramount importance.

## ROUTINE

### **Transmission Preemption:**

Has no precedence over any other call and is handled sequentially.

***Application:*** Precedence is reserved for all other official communications.
